# BIRD LIST

## Jonathan Dickinson State Park

Clare-Rue Morgan

### Florida Scrub-Jay (*Aphelocoma coerulescens*)

Jonathan Dickinson State Park (11,471 acres / 4,642 hectares) contains some of the most significant and diverse biological communities in southeast Florida. The park offers a variety of trails to experience these habitats, including sand pine scrub, flatwoods, wet prairies and dome swamps. It also includes 9 miles (15 kilometers) of boating and canoeing along Florida's first National Wild & Scenic River, the Loxahatchee. This mosaic landscape attracts a large variety of birds. Some are permanent residents and others are migratory, but all 158 species have been documented within the park.

This list was last updated August 2010.
